PRESSRELEASE 2024-06-14

Woodsafe Timber Protection launches new fireimpregnated wood product, safe for people and the environment.

WOODSAFE® PRO Green (WPG™) is the result of extensive development of health and environmentally friendly fire-protected wood without the content of labelled hazardous chemical content. The product is now being launched in Europe.

For years, PRO™ has been used in thousands of wood projects to protect people and buildings from fire. Woodsafe now goes further and strengthens market leading position by meeting the market demand for more environmentally friendly solutions without the use of functional borates. This is done by replacing the PRO product with WPG™. The new formulation of the fire retardant WPG™ does not contain any chemicals listed on the REACH SVHC list.

WOODSAFE® WPG™ is a premium product that fulfils the requirements of the EU Construction Products Regulation CPR 305/2011. Some of its characteristics include: 100% free of substances requiring labelling, approved emission values, pH neutral, non-hygroscopic properties. At launch, the WPG™ product is environmentally assessed and approved under all relevant assessment schemes, giving municipalities, government agencies, architects and builders the opportunity to use wood in both indoor and outdoor environments for a sustainable future and legacy for future generations.

WOODSAFE® WPG™ will be launched in conjunction with the Trä & Teknik fair in Gothenburg on 3-6 September 2024.

Om Woodsafe Timber Protection AB. (556630-5321)

Woodsafe Timber Protection AB är en tillverkare som specialiserar sig på industriell brandskyddsimpregnering av massivträ och plywood. Sedan starten 1990 har bolaget utvecklat specialanpassad utrustning och effektiva processer enligt konceptet CO2 SMART™. Verksamheten omfattas av tredjepartsförsäkring och är sedan 2008 den enda tillverkaren med två system och typgodkännandebevis enligt Boverket BBR och Plan- och Bygglagen PBL (SFS 2010:900).

Woodsafe Timber Protection AB var den första CE-märkta tillverkaren av brandimpregnerat trä i Europa, och vårt kvalitets- och ledningssystem är certifierat enligt ISO 9001:2015, ISO 14001:2015, ISO 45001:2018, EcoVadis Gold och WQS 2.0. Vi hanterar årligen mer än 1400 unika projekt med distribution över hela Europa och vissa delar av världen. Våra tjänster tillhandahålls genom noga utvalda och ledande samarbetspartners inom träindustrin.

Referensprojekt inkluderar världens högsta träskyskrapa, Mjøstårnet i Brumunddal, världens största ektak Gardermoen Pir Nord, Ilulissat Icefjord - UNESCO World Heritage Center i Grönland, samt Cederhusen. Varumärket WOODSAFE® ägs av Woodsafe Timber Protection AB."
